SUMMARY

Quality Assurance and Data Analytics professional with 12+ years of experience in manufacturing and beverage production at Coca-Cola Bottling Company of Ghana. Expertise spans quality systems, food safety, SPC, CAPA, audits, and operational excellence, combined with strong analytical capabilities in SQL, Power BI, and Excel. Proven track record of leveraging data-driven decision-making to improve process performance, reduce non-conformances, and enhance operational efficiency — including leading quality assurance programs, supporting major compliance audits, and developing automated reporting solutions that turned quality and production data into measurable business results. Independently built a complete end-to-end SQL and Power BI analytics project to extend these skills into broader business intelligence work. Open to remote data analyst roles and freelance/contract quality and BI consulting.

PROFESSIONAL EXPERIENCE

Quality Assurance Supervisor & Co-packing Lead

May 2023 – Present

Coca-Cola Bottling Company of Ghana — Accra, Ghana

- Ensure full compliance with Coca-Cola quality standards for all syrup and beverage produced at the co-packing plant, serving as the sole on-site quality lead and reporting directly to the Regional Copacker Leader (Morocco).
- Monitor incoming concentrate and sugar to confirm conformance before production begins, tracking quantities via Excel-based reconciliation to ensure full accountability of materials.
- Oversee in-process quality checks on syrup and beverage throughout production, ensuring compliance with product standards and regulatory requirements.
- Ensure finished products are safely verified and released from the co-packing plant to the Coca-Cola warehouse.
- Conduct full 360° material-to-finished-goods reconciliation with the co-packing plant, calculating production yields and reporting results to plant leadership to identify losses and improve efficiency.
- Prepared the co-packing team for two consecutive GAO Audits conducted by The Coca-Cola Company, strengthening compliance processes and documentation — both completed with no major findings.
- Conduct monthly Statistical Process Control (SPC) analysis across all products manufactured at the plant; developed an automated SPC/Cpk reporting system that generates instant process capability results from monthly test data.
- Deliver ongoing quality training and coaching to co-packing plant personnel, and serve on Coca-Cola's internal audit team, auditing against KORE quality requirements.
- Independently completed Data Camp certifications in SQL, Power BI, and Data Warehousing to build automated scripts and dashboards for material yield performance and visualization.

Quality Assurance Technician

September 2015 – April 2023

Coca-Cola Bottling Company of Ghana — Accra, Ghana

- Performed beverage and packaging analysis including Brix, CO₂, fill height, torque, closure integrity, and sensory evaluation.
- Cleaned, validated, and analyzed production and quality datasets to support plant decision-making.
- Built Excel-based dashboards for tracking KPIs and daily quality performance.
- Conducted root cause analysis (RCA) investigations and implemented corrective and preventive actions (CAPA).
- Verified incoming materials for conformity to specifications, labelling, and coding accuracy; supported successful ISO audit cycles through strong documentation and compliance practices.

Public Affairs & Communications Assistant (National Service)

September 2014 – August 2015

Coca-Cola Bottling Company of Ghana — Accra, Ghana

- Led plant tours for government agencies, corporate partners, and community groups.
- Processed customer feedback and complaint data, generating reports for QA and Marketing.
- Supported internal and external communication, documentation, and stakeholder engagement.

INDEPENDENT PROJECTS

Order-to-Cash Sales & Profitability Dashboard — *SQL + Power BI*

Independently designed and built a complete end-to-end business intelligence project: a governed SQL data warehouse (star schema, dynamic row-level security, surrogate key design) feeding a two-page Power BI report analyzing sales, profit margin, and order fulfillment across a 4-year, multi-state distribution business.

SPC Automation System — *SQL + Excel*

Automated Cpk and control chart generation from monthly quality data, replacing manual calculation with an instant, repeatable reporting process.

Yield Analysis Automation — *SQL + Power BI*

Automated monitoring system for material yield performance, replacing manual tracking with live dashboards used in monthly leadership reviews.

Material & Quality ETL Pipeline — *SQL + Power Query*

Standardized and automated dataset cleanup for material tracking and quality reporting.

Enact OOS Detection System — *Regional — ECCBC*

Contributed to a regional team that configured and optimized out-of-spec detection accuracy across multiple markets, coordinated remotely.

CERTIFICATIONS

Power BI Analyst · SQL Advanced · Data Warehousing · Excel for Data Analytics · Associate Data Analyst — all completed via DataCamp

EDUCATION

BSc Applied Biology

CORE SKILLS

SQL (Joins, CTEs, Window Functions) · Power BI (DAX, Data Modeling, Dashboards) · Business Intelligence · MySQL · Advanced Excel · ETL & Data Cleaning · Data Warehousing · Star Schema Design · Row-Level Security · Dashboard Design

SPC (Control Charts, UCL/LCL, Cpk) · CAPA · Root Cause Analysis · GMP & Food Safety Compliance · KORE Requirements · GAO Audit Readiness · QEOSH Reporting · Material Verification & Traceability

KPI Reporting to Senior Leadership · Remote & Cross-Market Collaboration · Compliance Training & Coaching · Stakeholder Engagement · Independent Work Execution
